

Building and scaling a high performing payroll system with TAPS and Ascender Professional Services

Ascender's Professional Services teams delivers a complete system configuration compliance audit that is consistent with the business process review conducted by The Association of Payroll Specialists (TAPS).

The combined approach looks at payroll functions and provides recommendations for a system configuration that matches the interpretation of your employment instruments.

By streamlining your payroll audit and compliance review, your payroll teams have a cohesive and controlled set of recommendations to deliver results for a compliant and consistent practice.

By adopting an integrated system configuration and business process review:

Reduce risk of outages and security breaches through visibility and tracking of changes to your payroll systems

Cost reduction by having detailed knowledge of all the elements of your configuration avoiding wasteful duplication of your payroll system requirements

Improve experience for your payroll staff and employees by rapidly detecting and correcting improper configuration that could negatively impact pay runs

Strict control of your processes by defining and enforcing formal policies and procedures that govern pay run schedules, status monitoring, and auditing

Greater agility and faster problem resolution, enabling you to provide a higher quality of payroll service

Efficient change management by knowing your baseline configuration, and having the visibility to design changes to avoid future problems

Quicker restoration of service in an outage, you will be able to recover quickly as your configuration is documented and automated

Handling unplanned and unexpected changes to your payroll system is a critical consideration in a configuration and business process audit. Ascender Professional Services and TAPS help you discover, control and monitor all changes to your systems, keeping your business and employees secure.
